Document	SSAD Project Concept Document
Creation date	25th August 2015
Created By	Raghuram Vadapalli, Venkat Vishal Batchu, Nikhil Tadigoppula, Gogol Syamantak Das
Client	Abhinav Pachauri, Playzio

Description:

Tangram is an android game. We are going to implement additional features for the existing application. The features we will be working on are as follows:

- Make the game compatible for multiple resolutions.
- More puzzle levels and multiplayer functionality.
- Daily bonuses for players.
- Leaderboards(weekly) and Achievements.
- Automating release and deployment process.
- Competing with Facebook friends and sending invites.
- Releasing the app for multiple stores other than Google Play.

Profile of users:

The end users are mostly children and casual gamers.

Usage model & Design:

As said, the target users are casual gamers. The game is played in leisure for fun and challenge.
